The aromatics and blood oranges are dissolved in water, after which sugar syrup, additional water and alcohol are carefully added.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                           |                                                                                                                                                         |                   |            |

|                      | <p>Aperitivo Aspide by Silvio Carta opens on the nose with vivid impressions of citrus groves and Mediterranean scrub, enriched by smooth cinnamon and very light touches of resin and pine nuts, evoking the wild, sunlit landscapes of Sardinia. On the palate it is lively, tantalising and enthralling, marked by a subtle bitter note and an unmistakable savoury hint that give depth and balance. The finish is long and refreshing, with a prolonged aftertaste of blood orange and citrus zest. Aspide Spritz is a reminder that borders do not exist: while it recalls the aperitif used in the famous Venetian cocktail loved worldwide, its swirling aromas and flavours clearly express Sardinian identity. Although excellent in a spritz, it is also perfect served neat in a large glass filled with ice and finished with a twist of orange peel, which beautifully complements the naturally citrus-driven profile.</p> |                                                                                                                                                           |                                                                                                                                                         |                   |            |
